### Abstract:

This new roadmap for 2011-2015 follows on the Global Plan to Stop TB 2006-2015 while setting new and more ambitious targets for the next five years. The action plan, for the first time, identifies all the research gaps that need to be filled to bring rapid TB tests, faster treatment regimens and a fully effective vaccine to market. It also shows public health programmes how to drive universal access to TB care, including how to modernize diagnostic laboratories and adopt revolutionary TB tests that have recently become available.
